★★★ Why a Front-Loading Wash Machine? ★★★

Front-load washing machines are not a new concept; they have long been used in commercial laundries. In recent years, however, they have become very practical for home use.

Conventional, top loading washing machines wash clothes by using an agitator to move clothes back and forth through sudsy water, and then again through clean water to rinse out the detergent. These machines are known as vertical axis washers.

Front-load washing machines are sometimes called horizontal axis washers. There is no agitator to push the clothes because the tub itself moves, causing clothes to be repeatedly lifted and moved through the sudsy water.

BENEFITS OF FRONT-LOAD WASHERS

Energy Efficient	Use up to 50% less energy than traditional top-loaders, resulting not only in water conservation, but also shorter drying times and lower utility bills. Why less energy? Faster spin speeds allow clothes to come out drier from the washer, resulting in less time in the dryer. Need less soap (a low sudsing detergent is recommended).
Easier on Clothing	Gentler agitation. Less dry time results in less wear on fabric.
Larger Capacity	Horizontal axis design does not require an agitator, allowing for greater load capacity and a larger capacity means fewer loads of laundry.

OPTIONS AVAILABLE ON FRONT-LOAD WASHERS

Sanitary Cycles	This cycle can wash at temps high enough to kill bacteria and mold.
Stainless Steel wash baskets	These baskets won't rust, crack or snag your clothes.
Quiet operation	Floor plans now often place laundry areas closer to living spaces, making quiet machines desirable.
Stackability	Save floor space without giving up capacity by stacking your laundry appliances.
Steam	Some manufacturers incorporate steam into the wash cycle, which loosens the fabric, allowing for better soil extraction.
Adaptable Dryer Controls	These controls allow for stacking flexibility. Stacking your laundry pair to save space no longer means sacrificing convenience.
LCD Controls	These controls offer greater cycle selection, ease of use, and flexibility.

FRONT-LOADING LAUNDRY BRANDS CARRIED BY KENNEDY-HAHN APPLIANCE:

★ Amana ★ Asko ★ Bosch ★ Frigidaire ★ GE ★ LG ★ Miele
